UPDATE
LONG TERM CLOSURE FOR BRIDGE HIT REPAIR
SR-60 AT THEODORE STREET IN MORENO VALLEY

SAN BERNARDINO-- The California Department of Transportation (Caltrans) has initiated a Director's Order (emergency project) to repair the Theodore Street overpass on State Route 60 (SR-60) in Moreno Valley. The overpass closed the afternoon of Friday, January 30, 2015 when an excavator being hauled on a flatbed truck struck the bridge while traveling west on SR-60 and damaged two girders. The \$1.5 million project was awarded to Skanska.

Updated engineer estimates indicate that the repair work will take approximately three to four months— weather dependent. The overpass will remain closed to allow for the demolition and rebuild of two of the six girders on the south side of the bridge over westbound SR-60. It is possible that traffic control will be used in the future as work progresses.

While the current detour is to use Gilman Springs Road, motorists are advised to use alternate ramps before and after Theodore Street.
